

DN-500BD: Update firmware via USB device

1. Create a folder named "UPG_ALL" in the root directory of a USB flash drive.
2. Place the firmware files in the folder(8560_linux_demo_dbg.bin mt8560_bl_linux.bin)
3. Insert the USB flash drive in the USB port on the front panel.
4. The update process will start automatically. Follow the instruction on the TV screen.
5. If the update process doesn't start automatically, do the following:
 - a. From the home screen, select Setting.
 - b. Select device setup.
 - c. Select firmware.
 - d. Select upgrade.
 - e. Select USB storage.
 - f. Follow the instructions on the TV.
6. Once the firmware update is completed, this product restarts automatically.
